

AKRA TEAM Templates

“Your key to success”

AKRA TEAM offers **high quality Templates** and other documents for various kinds of purposes. The Templates **are based on years of experience** in conformity assessment procedures. They provide not only content from the respective regulatory requirements, but also **specific suggestions for drawing-up the content** as well as pre-written text passages which can be easily adapted to the needs of your medical devices or in-vitro diagnostic devices.

As such, they are a **sound foundation** for drawing up required documents (e.g. plans, reports) for the Technical Documentation, to be submitted to the Notified Body.

Participants of AKRA TEAM trainings will receive a **5 % discount** for the respective templates, which were presented during the participated training.

Your benefits:

- Fast and efficient creation of TD documents
- Reduced risk of deficiencies
- Higher success during conformity assessment procedures

Please order templates via the form on next page via: info@akrateam.com
